# Vision

As NFT and blockchain gaming is gaining traction day by day, thousands of NFT projects are born within the crypto space, presenting various kinds of NFT collection and gaming experience. However, most of the newly released NFT projects lack a long-time goal with a clear direction of what they want to be, resulting in a project that consists of only a token and a game that vaguely uses those tokens as rewards without cohesion.

# Vision

---

Moreover, as blockchain adoption increases rapidly across the world, NFT and blockchain gaming has evolved into a new form - Metaverse, where it encompasses not just a simple game or a token, but a decentralized virtual world where people can connect seamlessly in all of their blockchain activities, and everything is possible.

# Vision

---

What MetroGalaxy wants to bring to the table is a Decentralized Virtual World that combines the best out of a strong development team with blockchain experience, a unique approach to metaverse and an active community that will eventually build the product themselves. We have a lot of unique advantages:

- Being a gamified virtual world and social platform for crypto enthusiasts, MetroGalaxy goes outside the range of your typical NFT collection games.
- The community can build their own MetroGalaxy areas, assets, quests and gets rewarded for their contribution, which aids greatly in MetroGalaxy's self-sustaining growth, expansion and product stickiness.
- A play-to-earn mechanism that encourages users to interact with the world AND each other, making it not just a one-way emotional connection between the player & the world.
- A strong and active user base that will allow monetisation through advertising and sponsorship from both MetroGalaxy users and third-parties.
- MetroGalaxy will not stop expanding. After the initial release, we will aim to integrate natively a range of blockchain solutions, including DeFi services, NFT marketplaces.

---

## What Is MetroGalaxy

# MetroGalaxy

MetroGalaxy is a metaverse project that uniquely blends a social platform together with an online virtual game that lets its players role-play as anyone they want, do anything they want in an ever-expanding decentralized world. Currently it is being developed on Avalanche.

# **MetroGalaxy World**

---

The world of MetroGalaxy consists of various areas, each with a unique and immersive design. Players can interact with different elements in each area (e.g. enter a building, play mini-games, interact with NPCs or integrated protocols, etc.) as well as interact with other players (e.g. chat, compete in mini-games, etc.) given the right conditions.

# The MetroGalaxy World • Socialize

# The MetroGalaxy World • Play games

# The MetroGalaxy World • Create and share content

The MetroGalaxy World • Showcase NFT and advertise

# The MetroGalaxy World • Live your virtual life

# The MetroGalaxy World • Build your world

# The MetroGalaxy World • Build your world

# The Main Square

Consider this as the central area of our main city. Always bustling with energetic people and different activities, here is where you start the game for the first time as a MetroGalaxy citizen. Aside from decorative buildings, the Main Square consist of several special building where you can enter and interact with.

# The Central Park

The Central Park is a huge area just outside of the Main Square, where you can walk around and explore the unique arrangement of MetroGalaxy's nature.

## Conceived By The Team, Built By The Community

While initially, the main development force will be the core MetroGalaxy team, we understand that with the support of our talented community, we can be even bigger. In the future phases of development, the community will have the means to be real builders behind the world of MetroGalaxy.

MetroGalaxy will have tools that support creators in a variety of ways:

- Game artists can design assets to be used in Metaverse maps;
- Game developers and designers can build maps and design quests, much like RPG Maker.

All contributors will be rewarded, and the more users engage with their maps and use their assets, the bigger the reward.

# Metronions - Citizens Of MetroGalaxy

Users can join MetroGalaxy as a citizen to socialize, explore the world, trade items and create their own virtual life. Each user has a character represented by an ERC721 NFT, which acts as a part of their digital identity.

There will only be 10,000 characters released at the beginning. We will classify the first 10,000 Metronions as the First Gen class. In the future, we will release different batches of characters that are of different races/traits compared to the 1st batch.

# Mint Yourself Into The World

The interface shows a grid of nine items, each with a preview icon and a label below it:

- SKIN (green preview)
- HAIR (grey preview)
- EYES (grey preview)
- MOUTH (grey preview)
- TOP (grey preview)
- DOWN (grey preview)
- ACCESSORIES (grey preview)
- VEHICLE (grey preview)

A green circular arrow icon is positioned above the SKIN and HAIR icons.

**Mint**

Metronions are randomly generated with different traits and will be revealed after the NFT sale period ends.

All Metronions come with basic accessories that can be changed by minting unique and limited accessories (ERC1155). These accessories are reflected directly in the Metronion's design in the NFT and in-game.

Accessories customization allows users to have a unique look that truly represents themselves and adds more value to their NFT. While limited in number, new accessories designs are updated constantly with different themes, and the options are limitless.

# Metronions Body Parts

# NFT Land

# The METRO Token

## Our Native Token METRO Is Used Throughout The System In A Number Of Ways:

- METRO is used in-game as native currency to facilitate quests and rewards.
- Staking:
  - Stake METRO to earn mystery box rewards. Mystery boxes include seasonal clothes and accessories for Metronion, home decorations, and in-game boosters.
  - Stake METRO to guarantee a slot to buy Land NFT.
  - Partner projects can launch their NFT on METRO Staking vault.
- Marketing & Promotion - METRO will also be used to run incentive programs, event rewards and facilitate partnership ideas.
- Governance:
  - Token holders - can vote on small-scale decisions (new map themes, accessory themes, etc.)
  - Metroverse citizens (holding both METRO token and Metronion NFT) - can vote on larger decisions, including:
    - All proposals that normal token holders can vote on
    - Next-gen Metronion minting strategy
    - Advertising and marketplace fees

# Tokenomics • Summary And Release Schedule

Total Metro Token: 10,000,000,000

# Tokenomics • Summary And Release Schedule

Type	%	Amount	Price (\$)	Valuation (\$)	FDV (\$)	Vesting Schedule
Seed Round	4.00%	400,000,000	0.0008	320,000	8,000,000	8% At TGE, 6 Months Cliff, The Rest 92% Unlocks Monthly Over The Next 23 Months
